Basil Lee

Basil Lee is a registered architect and LEED accredited professional at the New York office of Skidmore, Owings and Merrill. He joined the office in 2005 and is an associate working on large scale mixed-use developments, super-tall high-rise towers and commercial office buildings in various stages of design and construction. Mr. Lee has a particular interest in creating active urban spaces and the relationship large scale buildings have on the urban fabric. He is currently designing a 133 story tower in Seoul, Korea which integrates multiple sustainable design strategies throughout the building, including novel ways to generate renewable energy using building stack effect. Mr. Lee is also working on various projects in Rhode Island including the adaptive re-use of a series of previous mill buildings along the Blackstone river. He earned his master of architecture degree from the Harvard Graduate School of Design.
